ALDOSIMONE DI ROSA

Full-Stack / Product Engineer | React | Next.js | TypeScript | Node.js

Italy | Open to Remote Roles Worldwide | aldosimone@live.com
github.com/Aldosimone99 | aldosimone99.github.io

PROFILE

Full-Stack / Product Engineer building and shipping SaaS products end to end. Currently leading technical development of a multi-tenant healthcare platform, with ownership across product implementation, frontend, backend, database design, security, testing, CI/CD, and production deployment. Strongest with React, Next.js, TypeScript, Node.js, PostgreSQL, and Supabase. Comfortable working directly with founders and turning product requirements into production features.

CORE STACK

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind **Backend:** Node.js, REST APIs, Java, Spring Boot
Data: PostgreSQL, Supabase, Redis **Delivery:** GitHub Actions, Vercel, Render, CI/CD, Vitest
Security: Auth, RBAC, MFA/TOTP, CAPTCHA, rate limiting, AES-256-GCM

EXPERIENCE

Full-Stack Developer & Technical Lead - Beauty Broker World (Startup)

2026 - Present

- Own end-to-end engineering of a multi-tenant healthcare SaaS product, taking features from requirements and architecture through implementation, testing, and production deployment.
- Build the product with Next.js, TypeScript, Node.js, PostgreSQL/Supabase, and Redis, including role-based access for patients, professionals, clinics, and platform administrators.
- Shipped core product workflows for bookings, professional availability, treatment catalogs, consents, onboarding, payments, and organization management.
- Implemented production security controls including MFA/TOTP, CAPTCHA, rate limiting, session management, and AES-256-GCM encryption for personal data.
- Own CI/CD and deployment across GitHub, Vercel, Render, and Supabase while working directly with founders and stakeholders on product and technical decisions.

SELECTED PROJECTS

React Dashboard - React + TypeScript

github.com/Aldosimone99/react-interview-starter

- Built search, filtering, sorting, URL-based state, and reusable custom hooks for data management.

Full-Stack Web App - Angular + Java

github.com/Aldosimone99/citylife-fullstack

- Built an authenticated CRUD application with REST APIs and frontend/backend integration.

EDUCATION

Bachelor's Degree in Computer Science for Digital Business (L-31), in progress - Pegaso Telematic University
Full-Stack Developer Program - Start2Impact **Nautical High School Diploma**

LANGUAGES

Italian: Native **English:** B2 - Professional working proficiency
